Image Prompt Guide

Create your personalized guide for writing prompts to create images with AI by adding your own tips on the back.

Tip I: Structure and prioritize	A simple template: • Subject + action • Style/medium • Composition/framing • Light • Color palette • Optional photo/camera details or artistic texture • Format controls (aspect ratio; key negatives) Put the most important info first; keep it to 1–2 sentences or a short comma-separated line
Example	*“Stormy sea and steam-boat, Romantic oil painting, swirling brushstrokes, deep space, dramatic spotlight through clouds, muted earth tones, wide shot 16:9.”*
Tip 2: Be specific and visual (use the style guide)	Pick 3–5 concrete features from the guide (color, light, composition, line/shape, texture). Avoid vague words like “nice” or “cool.”
Example	*“Portrait of a violinist, Ukiyo-e woodblock look, bold outlines, flat color blocks, asymmetrical composition, warm red–gold palette.”*
Tip 3: Iterate like an artist	Generate, compare to your 3–5 targets, then change only 1–2 things per try (e.g., soften light, shift composition, adjust palette). Use negatives/aspect/seed if needed.
Example	*“Same prompt, but soft diffused window light instead of spotlight, complementary blue–orange palette, keep 4:5, no watermark.”*
